EDUCATION TOUR 2010

Treatment Summary Sheet

Prepare the surface. Wash the hair with **Brazilian Blowout Anti-residue Shampoo**, specially formulated to avoid stripping color. Be sure to really scrub around the hairline, nape of the neck, and from the mid-shaft down.

Towel-dry the hair. Make sure hair is damp; not too dry, not too wet; approximately 75% dry.

Divide the hair into four panels. You will always start from the base of the head and work your way to the top.

Apply the **Brazilian Blowout Professional Solution** section-by-section, using an applicator brush and a comb to pull solution through the hair. When applying the solution, make sure you are dusting the product on the hair; apply directly to the root (not scalp) and work the product from root to end.

Blow-dry the hair with a round brush or a paddle brush (professional preference). Get the hair as smooth as possible so the flat iron will glide through the hair.

Flat iron the whole head of hair to seal the product into the hair. You should be using a 450 degree flat iron. You will take 2-3 inch sections of hair and apply the flat iron from root to end using the same tension all the way down the hair shaft. Pass over each section about 4-5 times. For a straighter appearance, pass over the hair 7+ times.

Rinse the solution from the hair with water for 1-2 minutes (do not shampoo).

Apply **Brazilian Blowout Deep Conditioning Masque**; leave in for approximately 1 minute, then rinse (do not shampoo).

Apply small amount of **Brazilian Blowout Daily Smoothing Serum**, starting at the ends and working up.

Blow-dry with fingers as desired, or with a flat or round brush for the smoothest, sleekest appearance.
